6. Versions compatibility.....	3

1. Release purpose

This release contains the first version of SugarAide application. SugarAide is Android-based application assisting Sugar users in communication with Sugar contacts.

2. New functionality

1. Sending Clients data from Sugar to the address book of the mobile device.
2. Displaying latest contact activities upon incoming call.
3. Providing the possibility for administrators to deactivate SugarAide users. It will delete all Sugar related information from a user's mobile device.

Note: the following modules are added to Sugar:

- *GCM Messages*
- *User News*
- *GCM Registrations*
- *GCM Subscriptions*

3. Fixed issues

Defect	Description	Solution
